

Luxsound™

LIGHT  
Speaker  
ENLIGHTEN YOUR AUDIO

State-of-the-art **LIGHT & SOUND** in one unit.  
Installs like a light bulb.

**BRILLIANT LED LIGHT  
MULTI-ROOM MUSIC  
WIRELESS TECHNOLOGY**

Replace your amplifier, speakers, and light bulbs with easy installation and wireless technology.

**What is a LightSpeaker®, you say?** It is a product utilising patented AudioLight® Technology. It's an LED light and a high quality loudspeaker that installs like a light bulb. The LightSpeaker® is designed to fit into the ceiling in place of existing recessed downlights. They also may be fitted to selected pendant downlights, table and floor lamps.

This combination marks the beginning of a new category and an age where multi-room audio is accessible and affordable for everyone. The LightSpeaker® system utilises a proprietary 2.4 GHz wireless technology that is discreet from your home network. The LightSpeaker® includes a digital amplifier, speaker, wireless audio receiver and dimmable LED light - all in the one fitting!

You can connect two music sources to the transmitter as well as establish two separate listening zones in your home. For example, you can have a LightSpeaker® in the kitchen playing classical music, while the LightSpeaker® in the living room plays rock and roll.

Installs into approved table lamps or ceiling applications when Luxsound™ ceiling down light fitting has been installed. Light lasts up to 15 years or more, saving you up to 50 light bulbs.

Replace your light bulbs and add music too!

**Complete LightSpeaker® System**  
(Comes with 2x LightSpeakers®,  
wireless transmitter & remote)

**AudioRock**

**Single LightSpeaker®**

**Wireless Transmitter**

**Subwoofer**

**Remote**

## BRILLIANT LED LIGHT

- Reduce lighting expenses up to 80% daily
- 15 year lifespan (up to 50 light bulbs)
- Designed for the ceiling\* or selected pendant & table lamps

## MULTI-ROOM MUSIC
